Pecina Seeks Constitution Revision

The Student Council decided at its meeting on Friday, October 14, to question the limitations of the Council in regard to financial matters. The Council raised the issue when President Tony Conte announced that no funds were made without an attempt being made to get the Council's approval as a whole.

The Council also took up the question of revision of the Constitution, the condition of the Recreation Room, and the student office. In addition, President Conte mentioned discussions concerning the subject of a student directory and the Council heard a report from the committee to investigate the use of discount cards.

These matters came up in the long, extending Student Council on record — two hours and thirty-five minutes in length. In the appropriations, the first grant was of $350 for Chilean disaster relief, and the second was appropriated in July and given to the Reconstruction Finance Corporation. The trip to the National Student Congress at Minnesota in August was also sponsored and was previously granted by the Council, president Drury said. It was decided that the trip be canceled because earlier, less expensive tours already had been abandoned. He emphasized that he had nothing to do with approval of the executive committee.

ACTION POSTPONED

After discussion of the Student Council, the question of whether the Council or the Executive Committee should be able to amend any such action in the future was postponed for the consideration of the next Council meetings.

CONSTITUTION REVISION

The President, Mr. Butler, announced that the acting vice-president Douglas Pecina would present for consideration of the opened paragraph of the Constitution a paragraph that would limit the names on the right side of the card. The question of the schedule that there should be no limits on right and requested that it be a question taken among the members of the student body on changing the constitution. Due to the fact that the meeting had already lasted more than two hours and that there was doubt about the presence of a quorum, the question of the next discussion could take place, President Butler, not being sure that the topic would be first on the agenda of the next meeting.

The unspoken question on the table was brought to the 'members' attention by the president during the meeting. The Executive Committee, the members of the Council was that the constitution should be changed in order to change their responsibility. It was decided that a committee would be chosen to inspect the room each day for five days, from October 17 through October 22, and this committee would judge the condition of the room. If it felt that the condition was not necessarily until January, the room would be officially closed for the following week, October 24-28. Alex Nagy, Richard Henschel, Joseph Jacob, James Haney, Rose-marie Piegros, Hazel Welch, Diana Carlini, and San-tanello are the members of the Student Council.

SCHOOL RINGS

Council secretary Donald Talis informed the members that, as far as changing the design of the School Ring was concerned, the Council could take no action. In the past, the Council has traditionally played no part at all. However, it has been requested that the change be made. The Council stated that while there was no possibility of changing the design, some slight modifications might be possible. These include raising the stone slightly, or putting a dark back on it.

STUDENT DIRECTORY

At the suggestion of the president, Mr. Butler, the Council agreed to appoint a committee to consider the publication of a student directory. The new administrative director, this directory will include the name, mailing address, home address and telephone number of each student, as recorded in the college, with the college. In addition, it will add the class level of each student, and whether the student is a member of each faculty member.

The committee to be formed, and all cards on the back of the student ID cards gave a report of the effect that it would make on the number of the committee, said that stores in the town of Union would be able to become the merchandising members of this discount plan. He reported that the plan would probably be ready by December. Other members of the committee were Judy Berry and Mar­ian Drury.

A committee of two people, Walter Westby and Rozert Piegros, was appointed to find out what the effect that the discount would have on last year's Carnival in adopting two foreign students. This year's Carnival chairmen were also confirmed. They are: William Mihaly and Joan Zilberman.

The next meeting of the Council will be held on Friday, October 23, at 2:30.

The Newark State College of the Student Council for the and Social Science, under the presidency of the National Democratic Party, Tuesday, October 25 at 6:30, Mr. Butler has been a major factor in the formulation of the Democratic Party. Mr. Butler, as President of the Student Council for the U. S. Presidency, will also endorse Senator Kennedy, following Mr. Butler's talk will be a question period.

Class will be excused for the occasion but all who can possibly attend are urged to come to this session.

Congresswoman Florence Dwyer
Speaks on Political Issues

In this area, she said, that Federal education leaders will come, Mrs. Dwyer believed that a bill should be introduced which provides for Federal aid for education. This is done because, she said, that at a later date, when people have lost their fear of Federal control of education, the bill providing for teachers' salaries would be introduced.

At the Committee, Mrs. Dwyer asserted that New Jersey is not meeting its responsibility where education is concerned because New Jersey is in this field New Jersey is a "cheap, penny-pinching state" and that the fifth wealthiest state in the Union, relatively little is being spent for education.

Mrs. Dwyer spoke on both parties, and said that the Democratic cure is extremely idealistic and could never be realized, while the Republican platform is much more realistic and could be produced.

In the recent "bub-bub" ses­sions, the Democratic presidential candidate John Kennedy could not get his program through. Though there was a Democratic majority in Congress, Mrs. Dwyer believes that since the Democrats were the majority party, they selected members for the various com­mittees, as well as their chair­men, and still Mr. Kennedy was unsuccessful in getting the bills he desired to pass.

Mrs. Dwyer mentioned that at the close of the "bub-bub" session, the chairman of the House from the House Sam Rayburn spoke both to the Democratic and Republi­can members of the House and said that their responsibility was to the people of America, not solely to either party. Thus, she agreed, is the fundamental duty of all members of both the House of Representatives and Senate.

Mrs. Dwyer was invited to speak at the meeting of the College Young Republican Club, by the campus chairman of the Club, moderated.

On this day, Mrs. Dwyer discussed medical aid for the aged. She said that the Federal bill, presented by President Dwyer once to the Ways and Means Committee of the Congress, was pending.

The question Mrs. Dwyer discussed was medical aid for the aged. She said that the Federal bill, presented by President Dwyer once to the Ways and Means Committee of the Congress, was pending.

The first issue that Mrs. Dwyer discussed was the proposal that medical aid be provided at the Federal level to persons over 65 years of age. Mrs. Dwyer said that this proposal would be in the Constitution, and at that date, when people have lost their fear of Federal control of education, the bill providing for teachers' salaries would be introduced.

Student Council

The Student Council has shown that it is an active group as well as an active body. This was obvious in the meeting it held on October 12. To begin with, there was question of the appropriation of $350 in May and $90 in April of the Executive Board, for "emergencies." The members of the Executive Board are responsible to the student body, and we must agree with the Student Council that any money appropriations should be put to better use. Not only as a whole, and not just by the Executive Board, but as individuals, we must agree. Remember, The Student Council is not just an advisory board, and should not have the same limitations as other governing bodies. When The Council disagrees with itself and the Executive Committee at a later date, this fact should not be overlooked.

But the point now is whether Mr. Conte was right or wrong, or even if the expenses were valid. The Council is daring to question the actions of the leader, and this seems a healthy reaffirmation of democratic ideals.

A speech throughout at the recent meeting was the ex- ception. It would be possible to participate in all school activities, said Mr. Conte. The president, Doug Pecina, wants the first executive session of the year changed, wherein it admits that the "right to the rights of The Council" is under consideration. This latter statement is true, but again, that is not the point. Mr. Conte is a member of the Council members' attitudes was that this council is in danger of losing its rights. The point was well illustrated in discussion of the council. Not only did they realize that "nothing could be done because we have already been signed," The Council was, in a sense, in one instance where it had lost its right to speak. Obviously, The Student Council has no right to rubber stamp, and there's much to be grateful for here. It has only one right, namely, to question, to equally support for expansion, or to question the advantage of them, and criticizing those who abrogate their powers.

Disarmament

The problem of nuclear disarmament is one of the most important of our time. Many people, from left to right, would not deny that it is a matter of survival. Our problem is whether we agree to carry out, in good faith, a world-wide disarmament. I believe there would be a great lessening of tension throughout the world. We can observe on the front page of our daily newspapers, that the world is getting together. There is now a momentum in every country that is constantly seeking some effective way of stopping disarmament, assuming that disarmament is the constant negations, within and without, between nations. But even this point, we have the means. The entire situation reeks of impending crisis, and we can not allow it to be in- vital to concern all to peoples' minds. One thing must be inherent in the very importance of the situation; that is the need to be a tendency to identify the easy answer as the answer to the issue, and this way lies disaster. The subconscious conviction, that soon or late, a just and lasting peace will be found by the world, is a dangerous one. The only answer to disarmament, is one that is of first and an immediate and secondly distracting from other issues of the world. But there is no solution in the eternal struggle for peace.

The second reason this theory is invalid is that it makes disarmament the keystone of peace. In our country, there are many problems, minor as they are, that we have to handle before we can consider disarmament, and the theory justifies itself. Let us hasten to say we want peace, give us peace. Let us never give up on peace. In fact, we are the only country that never will lose it. Our country can be an example for all nations, that we care.

There are constant negotiations within and without, between nations. It is an im- possible task to try to persuade a government as a whole, and no less, by the Executive Board. We must agree with the Student Council that there are limits to the rights of individuals. And there are cons- cientious of too many people that is something which everyone should debate in his own mind, and not automatically ac- knowledged. The consensus of many people, that abrogates them, is so something which everyone should debate in his own mind, and not automatically ac- knowledged. The consensus of many people, that abrogates them, is so something which everyone should debate in his own mind, and not automatically ac- knowledged.
