Gore Stresses Need For Foreign Aid

The United States must respond to the needs and desires of countries which are receiving our foreign aid, rather than forcing our ideas of development on others, according to the late Senator Edward M. Kennedy. This was one of several points stressed by Mr. John Gore, of the Agency for International Development, at the first Seminar on International Development held here on January 11.

Mr. Gore spoke on his position as Special Assistant to Senator Arlen, Israel, and the role of the United States in distribution of foreign aid. He pointed out that our idea of development often differs greatly from that of other countries. As an example he explained that in many non-western nations, progress is associated with a closer bond with ancestors, a problem which the United States encountered in Korea.

Economists cannot become involved in the development of a country without a knowledge and awareness of all social sciences. "The Economic Development of a country means that we meet head on with culture, religious ideas," Mr. Gore said.

"Aid to Israel"

The goal of the Israeli government at this time was the effective development of these people. United States aid deals with immediate needs for transportation, health and communication, Mr. Gore said.

The old New State College campus at 187 Broadway, Newark. The possibility exists that this building may be converted into a school for the enforcement of all social sciences. "The enforcement of all social sciences meets head on with culture, religious ideas," Mr. Gore said.

"A Normal School for the improvement and education of Teachers shall be established in the High-School building. The Studies prescribed by the Board of Education in the Public Schools and the best methods of teaching will be taught by the instructors in charge of the Normal Schools," the School will be held on Saturday of each week during the regular terms of the Public Schools and shall commence at 9 o'clock A.M. and close at 12 o'clock P.M."

The College Bond issue of 1959 will provide for a building to be used as a school building for the enforcement of all social sciences. The school will offer courses in the English department, signed the petition entitled "Newark State College, Newark. New Normal School was established 107 years ago.

The school was placed under the direction of William N. Barringer and remained in this capacity until 1913 when the State of New Jersey assumed full responsibility, changing its name to New Jersey State Normal School at Newark. A new residence was taken up at the site of the former home of General Philip Kearny, a hero of the Mexican and Civil Wars. In 1952, the New Jersey State Normal School and Newark State College merged.

The school moved to the new building on March 17, 1938, as Newark State College. At present it remains one of the oldest institutions of higher learning in the United States.

Located on a 120-acre wonder campus in the heart of the New Jersey metropolitan area there remains original Norman architecture, formerly part of the estate belonging to the late Senator Hamilton Pkhtn Kean, across Morris Ave, from the is Liberty Hall, the former home of Goverd. Livingston, New Jersey's first Governor. The Town, directly descended from Governor Livingston, still own the property, no split, Uson.

Since 1938 there have been several additions to the campus including a new science wing for Townhall South, extension of the parking area, the College Center, relocation and enlargement of the INDEPENDENT ENY office, the Book Store, and offices, and renovation of the Kean Library and Keasbey A and B.

The College Bond issue of 1959 will provide for an additional building for the enforcement of all social sciences. The building will include a women's dormitory, a child-study center, and an auditorium equipped with music rooms.

Old Building Renovations

It has been recorded that the old building in Newark may possibly be sold for the nominal sum of $1,200. The building will be used as a school building for the enforcement of all social sciences. The school will offer courses in the English department, signed the petition entitled "Newark State College, Newark. New Normal School was established 107 years ago.

Privileged Parking Dropping

It was announced at the meeting that the "Privileged Parking for Seniors was abandoned for the time being. Pat Lipka, representing the Parking Committee stated that there are professors who rely on that existing network of parking facilities, Senior Privileged Parking should be abandoned until such time as adequate parking for a much larger percentage of students..." Jim Kuebler, of the Student Council, stated that he was a member of the Parking Committee and suggested that an investigation be made into possible parking space along Morris Avenue, as well as a petition to the Student Council. The secretary of the Parking Committee, those students and faculty members who park on campus or are interested improving these parking conditions should meet and appoint a committee of Carol Ann Donnelly, Mary McGovern, Evelyn Koperkev to investigate such a possibility.

Lecture Series Addition

Student Council and the College Center Board will co-operate to operate an Inaugural Lecture Series in conjunction with the INDEPENDENT. From the lecture on Monday morning, investigating conditions. Council approved this motion and appointed a committee that will extend the Lecture Series to in-...
Welcome Peruvians!

The program prepared for the Peruvian Olympic basketball team on Saturday, January 20, is one of the most ambitious and important undertakings Newark State has ever attempted. An effort by the all-college committee, under the chairmanship of Jim Hynes, has been made to prepare a program that would carry over the atmosphere and the events centered about the Latin American visitors. Their efforts are to be highly commended, and the program they have put together should receive the full support of students and faculty members.

A further example of the important role the program’s organizers have got to great lengths to provide the college community with an interesting program that would be a memorable occasion. Students will have an opportunity to meet and speak with the Peruvian visitors at a reception which will follow the evening basketball game; and aside from the preparations the college will receive from this interchange with the Peruvians, there is a great opportunity for students to make friends and to broaden their minds.

Let us keep the issue of nuclear testing out in the open. We are aware of our need to understand neutrinos to the East will use underground and underground methods to keep in constant touch with West.

As long as we are all scared, prayers can still help.

Douglas A. Pacheco, Senior

Francais Parle ic, Maybe?

In last week’s NSC Reacts columns, several valuable opinions were offered on ways of improving the college. One that found its way into the columns was the suggestion that the foreign language curriculum at Newark State be greatly expanded. This is a subject that merits further discussion.

In the near future, David L. Mapple, co-editor of the Student Education Services, will provide information about the program.

Here is a worthwhile campaign which should receive the support of every member of the college community. In a recent newsletter, the committee on nuclear testing has been formed by Dr. Howard Dildrary, who first proposed the undertaking to the Student Commission. He has brought forth a compilation of 300 books from a student body of approximately 3,000 students by the end of the school year cannot be met unless the response to this enterprise increases.

It is encouraging to see the determined efforts being put forth by the Renata Club and Kappa Delta Pi in the “Books for Asia” program. The organization has brought forth a compilation of 300 books from a student body of approximately 3,000 students by the end of the school year cannot be met unless the response to this enterprise increases.

The thirty-seven faculty members who signed the proposal ex­pressed concern over the dangers resulting from nuclear testing and recognized the potential for increased nuclear testing and the discussions revolving about the moral versus political and military aspects of the nuclear age requires a change of more enlightened, responsive attitudes on this campus.

The Anatomy of an Exam

by John Masteron

Once again, the students of Newark State College have been presented with the gauntlet of final exams. Some will go, most will stay, and all will render the monstrosity of the regularity that usually reflects them. What are these so-called creatures, exams? How do they come? Let us deduce the guise of the critical historian, and trace the evolution of this unspeakable exam from its inception through its cataclysmic death. Our thesis will be that these exams are the by-products of violent conflict between teacher and student, and that the exams are characterized by the aggressor.

For behind the scenes view of the exam's beginnings reach far back to the mudd of but one of Newark State's most distinguishable mentors, Dr. Claude Horribly. For weeks Dr. Frederick labored on for his war-cry: "They shall not pass!" It has been a cauldron of achieving emotion. A gym very quivering in anticipation of the coming fray. Night after night he remains barricaded in his sanctum sanctorum, pouring over moldy scrolls treating on such diverse subjects as alchemy, Etruscan pottery, and the mating habits of the Australian Wombat. In the final days, refusing rest or drink for a mere, he remains barricaded in his sanctum sanctorum, pouring over the non-motivated dog. Third, to keep his pants on display in the lounge by the Little Theatre. The majority of the rooms, refusing to do for the product of his labors.

But Dr. Frederick Horribly emerges from the jaws of hell. It will go on, this dirty business. The art of the enemy camp (us), morale will go up, this dirty business. The defenders are bloody but free. Then comes the evening, the final exam. It will happen to me after I die? The question is: "Is this an illegitimate age?"

Correction please! Due to a printer's mistake, the statement made by Dr. Wilkins in "Ugly Faces of 1962" was incorrect. Mr. Irving Luscombe's "Faculty Platform" were interchanged. Our sincerest apologies.

Art Majors Display Work in Gallery

by Warner

An exhibition of both painting and printing, by Fine Arts Majors, is on display in the lounge by the Little Theatre. The paintings are well worth a look.

Ed Hibbach, Freshman, observes exhibit.

"It seems that the paintings are mainly concerned with the expression of abstract ideas. The artists seem to be exploring the relationship between form and content. The use of color is varied, with some pieces using bright, bold colors, while others opt for more subdued palettes. The overall effect is a sense of depth and dimension. The students have certainly put a lot of thought and effort into these works, and I think they will be well received by the public.

Faculty Platform

by Kenneth Meeks

The question is: "Is this an illegitimate age?"

We are faced by a number of crises today, but by far, irresponsible behavior is the worst. Ungraveled and behaviorally charged by the question of authority and who is looked up to, we are at a degree of respect are not desirable, to be sure.

The editors of the Courier-Post (Camden, N.J.) questioning the motives of the NFC family members who questioned world political war, this examination fall into this field of irresponsible behavior. But there is no doubt that the American public must be made aware of the Communist menace. However, we can not employ the methods of the Communist nor do real reason, just the planting of the lie, and so by the way, if he was inspired by the Reds. Why did he wait until now . . .

Last week I applied the old business of "waddling quacking, I fly like a dick" making a one desk. While as the Courier-Post (Camden, N.J.) today after they are finished with their nuclear tests it is for determination, particularly one point--quaking, these are the lines that they then waddle and fly like a carcass. Therefore, they have to be, there can only be one avenue: freedom of expression. That is, if we can not deal with a problem which faces each and every one of us, the most that we can do is to overlook or gloss over the facts, we are concerned and have only expressed our concern in a semi-controlled system. For this is right, guaranteed by the Constitution, and it is a right which must be exercised. For example: that a person--college professor, laborer, truck driver, housewife, tenant farmer--may express his opinion on an issue of his choice. When rights are guaranteed by a constitution, the government is not, one finds them in a similar state to that of the Soviet Union. The American Post desires? (Note the hint, like that of a correspondent, maybe Red motives.) I doubt it. Rather, I think it is the editors of the Courier-Post who are relying on their right to a guaranteed free press. But, all editors have a responsibility to the citizenry to do their job.

The churches on the other hand have an interest in the sifting situation and are attempting to influence our thinking in various ways. They manifest a desire to have all the facts, not influence the decision: "Unbelievers, we are with you." No one who is interested and concerned, regardless of what happens, will happen to me after I die? The question is: "Is this an illegitimate age?"

Correction please! Due to a printer's mistake, the statement made by Dr. Wilkins in "Ugly Faces of 1962" was incorrect. Mr. Irving Luscombe's "Faculty Platform" were interchanged. Our sincerest apologies.

Spring

To what purpose, April, do you return again? Beauty is no longer. You can no longer quell me with the redness of your opening eye. I know what I want. The march on my neck as I observe The synapse of the cressus. The smell of the rain is good. It is apparent that there is no longer a reason for spring. But what does that signify? Not only the ground are the brains of men Eaten by maggots. Life is in the wind of a flight of uncarpeted stars. It is upon that yearly, down this hill, come like an idiot, babbling and swarming flowers.

**From The Sports Desk**

by Renny and Misher

The basketball team has won its last two games and seems to have "jelled" at last. Coach La Russa has had his problems, what with injuries and ineligible students, but with a little luck and hard work winning season is still a possibility. This department would like to thank Tom Kunc and Gene Harrel for the hard work they have done for the INDEPENDENT since January.

We cannot overemphasize the importance of a large student turnout at the Permian game Saturday, January 30. The gift of sporting equipment, to the boys will serve two purposes. The boys will have the benefit of using the equipment in their two basketballs, five bails, four pairs of boxing gloves and a combination badminton - volley ball set. The following week the gift derived from the gift is an intangible one. It will serve to further cement fine relationships that have existed between the club and the college. We feel that the other fraternities and sororities could manage to do something along similar lines.

Area National League baseball fans are waiting patiently for the "next big game" to make its first appearance in New York, Mr. Stengel in good for a few laughs, but all the same there is a sense of confidence on the part of the New York team that the World Series will be held in that city. Many fans, at this point, are more interested in being able to see some of the National League stars in action again. Players like Willie Mays, Stan Musial, Warren Spahn, Frank Robinson, Hank Aaron and the like have been missing from the metropolitan area much too long.

**Campus News**

**Squires Score Three**

In a free scoring contest on January 15th, in which both teams changed hands 7 times, Squires outlasted Newark College of Engineering for a 62-01 victory. Stan Davis who combined 11 rebounds with 12 points, and Carmen Marmo with 18 points and 10 rebounds were the mainstays in the Squire lineup.

Newark State College will be host to the Permian Olympic basketball teams on Saturday, January 20, under the auspices of the People to People Committee, Sports Division. Their schedule for the day is: lunch, practice, at 2:00 p.m., a buffet dinner at 6:00 p.m., game at 8:00 p.m. and a reception after the game in the cafeteria.

**Wapalanee Meets**

Plans were made for the next camping trip of the Wapalanee Club, at the regular bi-monthly meeting on Tuesday, January 25, that will be made to the School of Conservation at States State Forest, January 26, 27, and 28. The cost of this trip will be $8.00 per person because of expenses this past year. Those people wishing to make this trip must have the fee paid by January 23.

The members expressed an interest in a carnival booth representing Switzerland, but no definite decision was made. A committee was formed to discuss the suggestions given by the members at the meeting. All decisions made by the club are tentative since they must be approved by the Carnival Committee.

The next order of business was the club sweat shirts. Some members were interested in these and will be asked accredited with the club name. The possibility of obtaining sweat shirts for those desiring them is presently being investigated.

The next meeting of the club will be held Tuesday, January 25 at 7:30 p.m.

**Executive Board Meets**

The W.R.A. Handbook, with the exception of that section dealing with the point system, was adopted by the Executive Board which met on Tuesday, January 19. The section on the point system will be revised and reenacted to the Board for approval within two weeks.

The committee was formed to plan a tentative schedule of activities for the 1963-4 season.

**SEAReport**

**Continued from Page 2**

feration comparable to the doctor's and the resent with the school. After divi­
ding into work sessions, the first topic on the R.R.O. agenda is education, the main interest In a carnival booth rep­resenting Switzerland, but no de­cision was made.
