Passage of '64 Bond Issue To Aid College Development

New Classroom Facilities, Library and Food Service Center to be Built

New Jerseyans voted "yes" on State College bond issue, according to George W. Wilkins, Dr. Alton O'Brien, E. Theodore Stier, H. Willard Stern, and Miss Muriel Brotzman.

The total amount of the bond is $40,100,000. Of this amount, $19,069,000 will go to Rutgers; $2,531,000 to Newark College of Engineering; the six state colleges receive the remaining $18,490,000. The state college receives a good percentage in getting $1,100,000.

The 4.1 million dollars allotted to NSC will be divided three ways: 1.4 million dollars will be used to construct a new classroom building; 1.6 million dollars will be used to construct a food service building; and 800,000 will be used to construct a new library addition.

The proposed classroom building will have four story classroom, student lounge, seminar rooms and student centers. According to a college authority, the building will house something short of 40 classrooms. The reduction will cause a cut in the projected enrollment that was 4,200 for the school year 1967-68. A new number projected total will be approximately 3,000 students.

The area designated tentatively for the classroom building is located behind the old classroom building and adjacent to the auditorium. Another plan calls for the building to be constructed parallel to Townsend Hall next to the main entrance to the parking lot. The college administration opposes this plan. They feel construction of 300 rooms in this area of the campus would be too high, thereby causing too much congestion.

In addition, architect's conception of the new building would not fit with the pattern of the old buildings and classrooms now constructed.

The proposed date for ground breaking is spring 1965, according to a college authority. The construction of the building will start soon afterward.

The food service building will be constructed in the area across from Whitman Hall.

The proposed plan for the new library will utilize a building that houses 300,000 volumes, 4 classrooms, and 5 service read rooms, offices and attached library services. It will enable the campus community to be served and the administration offices will be retained 9 rooms for classroom purposes.

The food service building designated for this building is located at the present library and adjacent to the proposed classroom building.

The projected student enrollment for 1967 is approximately 4,000. The bond issue enables the admissions office to enroll an additional 250 students next September. Our faculty will increase in 1965 fifty-three-three, maintaining a 15 to 1 ratio between students and faculty. The class of 1969 will be numerically approximately the same as that of our present freshman enrollment.

Our total college enrollment in 2974 students now. In three years we will almost double that enrollment.

The long-range plan for Newark State, according to the administration, is for a multi-purpose institution which offers all-professional training in law and medical service training.

Fraternity and Sorority Perform Services During Pledge Period

This past week, during the three traditional days of fraternity-sorority hazing at Newark State, three sororities participated in the service which one day was observed to be "belle week." Constructive aid to proctors, the sale of lollipops, kisses, and gum for donations to CARE, trick or treat for UNICEF, and physical support for the Bond Issue are some of the undertakings of the groups.

"Beta Delta Chi Sorority," as stated by sorority president Judy Kreshak, "wished to provide the opportunity to the needy organization, which would be enjoyable to them, as well as beneficial to the needy organization, CARE." Beta Delta Chi thanked all who donated to the bond issue.

The sisters of Sigma Beta Chi, "wished to provide the opportunity to us, in that the bond issue would be enjoyable to them, as well as beneficial to the needy organization, CARE." Sigma Beta Chi also thanked all who donated to the bond issue.

The Carnival Committee chose "1964" as the theme of this organization's carnival. Ideas from George Orwell's novel can be used, as well as games with futuristic themes.

The committee will meet every first and third Tuesday of each month to discuss activities; the advisory group, of course, will be expected to excise themselves on faculty personnel matters.

"1984" Comes to NSC

The Carnival Committee chose "1946" as the theme of this organization's carnival. Ideas from George Orwell's novel can be used, as well as games with futuristic themes.

The committee will meet every first and third Tuesday of each month to discuss activities; the advisory group, of course, will be expected to excise themselves on faculty personnel matters.

NJEIA at Atlantic City

The annual convention of the New Jersey Education Association, the world's largest educational association meeting - will be conducted on Thursday, Friday and Saturday, November 12 to 14, at Convention Hall in Atlantic City.

Well over 30,000 teachers from every school district in the state are expected to register during the three days of meetings. In addition, 700 teachers will be on hand to tell keep teachers up to date on subject matter and abreast of developments in all phases of professional activity.

(Continued on Page 4, Col. 4)
COLLEGE CRISIS

On November 3 the New Jersey voters passed the $40.1 million college bond issue. Most educators endorsed this college bond referendum for its passage because a broad-base tax has not materialized. The bond issue is intended to finance only top-priority construction projects. Nevertheless, this referendum has rekindled a college bond enthusiasm that has been dormant for years.

In essence, the bond referendum has done nothing more than relieve the pressure on the taxing powers of college campuses. What has it done for the future when our secondary school graduates in 1970 at least 90,000 students?

The crises in higher education is this state is still real. Our college facilities must double by 1970 in order to accommodate qualified students. In 1963 alone 40,475 of the 65,756 high school graduates went on to colleges throughout the State. This represented an increase of 15.5% from the previous year, importance of a college education is continually rising. If something is not done, qualified New Jersey students will be unable to attend an institution of higher learning.

Approximately 92% of our students are attending colleges and universities outside this state. However, many of the out-state schools are discouraging New Jersey residents from attending. Under the present conditions, can anyone see a remedy?

The present bond issue and proposed building program accomplish the task. The Surveyor report has recommended $135 million for additional public college facilities in New Jersey and that the present facilities be doubled by 1970. Consequently, either a broad-base tax or further bond issues are required if the needs of higher education in New Jersey are ever to be met. New Jersey has traditionally constructed college buildings (1961 - $15 million; 1962 - $26 million). However, other states which have less of a bond issue tax have spent $150 million for construction and have a broad-base tax to include: Illinois, $195 million; Michigan, $250 million; and Ohio, $350 million.

Governor Richard J. Hughes has advocated a broad-base tax. A personal income tax (with half the rate of that in New York) would raise $100 million. A sales tax with a 2% rate would yield estimated $160 to $165 million annually. Either tax would realize approximately the same amount as the bond issue.

How much longer can the citizens of New Jersey turn their backs on our educational needs? They must provide more financial aid for the construction of higher educational facilities or delay the development of the education system.

Can you as an educated citizen sit back and watch qualified college students be deprived of higher learning? P.J.M.

INDEPENDENT

"LOONEY WARRIORS"?

Initially, let it be known that the D.I.E. PENDENT reserves the right to edit and report upon any argument, which assumes to be "public." Moreover, the accurate observation of these open events is considered pertinent and of great importance. Our forefathers deliberately lost a generation of youth. Can you as an educated citizen sit back and watch qualified college students be deprived of higher learning?

FREE LOVE I

To the Editor:

I would like to point out that contrary to what your paper indicates, the "Free Love" - Peggy Guggenheim, "Coy" was not the topic of a debate sponsored by the Humanist Club. The Humanist Club, in its proposition "Free love should be abolished" in America, therefore opposing the proposition "Free love should be encouraged". None of the debaters - pro or con, ever followed the line of contention at the beginning of the debate. This was because the Humanist Club introduced then exercise on academic freedom and free inquiry and the opposing side were not necessarily their views.

In essence, the topic of the club (sic) never "grew out of a heated discussion." Both sides were never introduced or adopted at any of our meetings.

If your paper should cover any future controversial topics, I would recommend (sic) that your reports be a tape recording of the meetings, because some of your articles (sic) were not accurately quoted. In addition, F. D. Trencher, Treasurer, Newark State College.

JACKET STOLEN

To the Editor:

The book review in your paper last week on "The John Birch Society" highly misstates the facts. This book contains a 31-page statement of the Platform of the John Birch Society. It will be accompanied by pictures of the biologist David electron, who was a former member of the John Birch Society, and other such references.

In conclusion, if I have intelligent colleagues who are interested in society and free inquiry I would suggest that they read the book both misrepresented as being all we read about it in your paper. This type of book is not accurate in its statements.

SCATE Reports

BY JEB CROEBK

We hear about it daily we read about it often; undergraduates talk about it, freshmen and transfer students talk about it. What is it? The evergrowing student population, except, of course, for the baby boomers, who are not all on campus. The population increase is coming as a result of the baby boom, the group whose views are both responsible and young. This is the population increase that we are faced with. It is the population increase that we are faced with.

Further, it is my understanding that a John Birch Society member who claims to be a "patriot" could not be buying a book to be reading the book. The Social Science Research Council is studying the problem of the book. The Social Science Research Council is studying the problem of the book. The book is not one which is being bought by the student body. This is the Social Science Research Council is studying the problem of the book. Texas "Monkey War" Flares: Another Scopes Trial??

AUSTIN, Texas (CPS) — A "monkey war" reminiscent of the 1925 trial in Tennessee is being planned in Texas this fall, with apparent victory going to the evolutionists.

At issue was the presentation of the theory of evolution in three public schools testately recognized by the state system.

Anti-evolutionists complained that the books presented the concept of evolution as a proven fact rather than as a theory, and added a formal protest against them with the State Textbook Committee, which annually rates on what books will be used in the state's school system.

After hearing testimony from both sides, the committee rejected the objection, but not before the books were denounced for advocating "atheism." 4.

R. G. Lemaire, editor of the firm Foundation for Fordham University, said he did not object to "the presentation of evolution as a theory."

"I recognize the fact of its origin," he said, "but it is presented as one possible theory, together with other theories -- such as the creation -- this is fine," he said, "but not as the only plausible theory and taught as such in the books, and thus in the school system.

During the hearings, Jack Wood Searls, a University of Texas graduate, challenged anyone to "prove" evolution by showing his ignorance of it. He would only show his ignorance, and the theory of evolution would be shown to be a true theory, and not to be a theory. 4.

After the hearings, the books were returned to the state, and the anti-evolutionists were denied a hearing.

The Party

By Anthony Caruso

CPS) The colorful and diverse audience votes answered the phone: "This is AT&T 3460. Can I help you?" "Yes, I want to talk with you about our party." The caller opened a door loosely attached to the telephone, and a band of a dozen people, uninvited, started to the headquarters of the strongest Marxist party in the United States.

"My name is Nal. I'm a member of the party in Iowa," said the caller. "We're from New York," announced the awestruck caller. "I've been here for a week, and I was led into the headquarters by an 8-foot tall man with a wide grin, who declared himself to be "a member of the party's leadership."

The Federal Republic of the party has a very large and diverse geographic unit along the West Coast of Africa, and occupies a position on the international scene. The movement is composed of several national organizations, each with its own language but the three largest are the United States, the United Kingdom, and France. In the United States, the largest population of any country, and the United Kingdom, the largest population of any country, the United Kingdom has a population of over 500,000,000 people. An ethnic roll call of this number would show over 500,000 different groups, like Hausa, Fula, Bantu, Tswana, and many more.

We have unity in diversity, like the United States October 4th, the official figure is reported as being 50,500,000 people, the largest population of any country. An ethnic roll call of this number would show over 500,000,000 people.

4. INDEPENDENT, November 11, 1964

**Communication Committee Established by Class of ’67**

The sophomore class is forming a committee to make interclass communication more efficient. This committee will be composed of one representative from each section within the class. It will be the responsibility of the two class presidents to see that these sections are chosen. The committee also and inform the Executive Board of the feelings within the class.

The committee is voluntary, necessary that each representative fulfill his duties faithfully and, more than anything else, be a good representative of the class. A report will be made to the Student Council after the elections and a formal report will be made to the Class Council meetings after the elections.

**NOTICE**

Students chosen as representatives must reply to the Executive Board by Nov. 16. Those who are not notified by Nov. 16 will be considered not interested in their representation.

**SCATE**

(Continued from Page 2)

The SCATE Tutorial Program is not new, neither is it peculiar to Newark State. In the past few years, across the country, par­ticular institutions have been many tutorial projects that have been made." The student population is hopefully engendered by the apathetic void at postulated by so many, how to do the majority of students as possible to student groups this year.

"We're going to speak as much about Newark State, Newark, and Newark State as we can. If you know anyone who wants to hear us, just tell us," said Tony. I returned down the croaky high, opened the bordered door plastered with posters, and the view was filled with several men in business suits up to the top. The woman behind her desk held down in the light wind. Cars whizzed by, and the program was unplanned, a part of the real work of New York 1964.

By Lynne Richards

**Tournament Reminder**

Every fall the W.R.A. holds the W.R.A. Invitational Basketball Tournament. Since this is one of the W.R.A.'s major projects of the year, the interest in this event will be more than a casual one on the part of student groups as they even send cheering sections to root their team to victory. Such an event will be held on Wednesday, November 18 at 7:00 p.m.

Since the tournament was originated, no team has ever won more than two consecutive years and that is an equal chance. In 1961 the freshman class, the class of ’65, won in 1962 the Ayleham Chicks. Last year Kappa Epsilon morority was the winner, after finishing second for the previous two years. The competition this year will be keen and there will be a prize for the winners.

**WRA Selected President College**

It has been officially announced this week that the Women's College of Newark State College will be the site of the annual Black Student College of the New Jersey Higher Education and the reports from the representatives must meet the Executive Board by Nov. 15.

"We are appealing to students and faculty because the white workers have been delayed by the labor strike. They have lost so many days, but they will find all the programs," Nate said as he raised his voice. He paused momentarily and exclaimed, "Don't you know anything about the civil rights movement? I would like to hear one of our cabins at a meeting."

A girl of 19 with long, flowing blond hair walked into the office. "They always change when they say ‘1017.'" she said in her most legitimate voice. "But I can't say I'm very sure about it," she added with a smile.

"We don't expect to win but we will certainly increase our vote from 1960 (36,54)," Nate replied. "That's all and that's the truth of the United States.
