Blackboard SafeAssign: A Plagiarism Prevention Tool

Empower student success with a powerful and effective tool for promoting academic integrity and evaluating originality.

SafeAssign

SafeAssign compares submitted assignments against a set of academic papers to identify areas of overlap between the submitted assignment and existing works. SafeAssign originality reports provide detailed information about the matches found between a student's submitted paper and existing sources. Both instructors and students can use the report to review assignment submissions for originality and create opportunities to identify how to properly attribute sources.

Use SafeAssign in the Ultra Course View

Easy to Use

Best in class user experience with exactly the information you need in a clean, understandable interface designed to minimize clutter.

Integrated Workflows

By integrating with your LMS rather than adding yet another external tool to work with, SafeAssign provides a seamless experience.

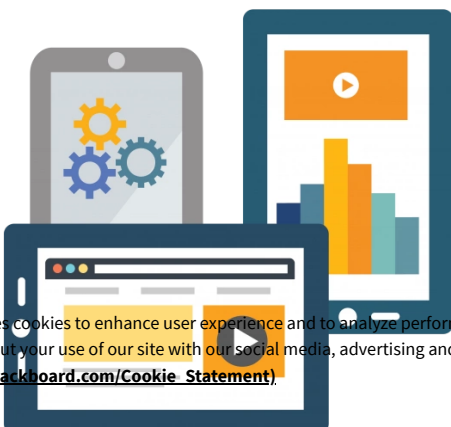

Robust Content Sources

User submissions are compared with content from other students at their own school, from other schools, from academic and business journals, and from the broader Internet.

Inline Match Comparison

Text matches are easily compared to the source content directly within the interface, and teachers can omit sources temporarily or permanently with ease.

Teachable Moments

Teachers can choose to allow students to see the results of Originality Reports, providing learning opportunities for understanding how to write and express themselves.
